

Sign in. Record Temperature. Ask COVID-19 Questions.

The Accushield sign-in and screening kiosk now integrates seamlessly with a touchless Thermometer

- > Sign in
- > Scan body temperature
- > Ask COVID-19 screening questions
- > Capture consent forms
- > Trace visitors & staff
- > Print name badges

ACCUSHIELD

INTEGRATED. TOUCHLESS. THERMOMETER.

Accushield Kiosk + Touchless Thermometer

The Accushield kiosk replaces the paper sign-in logs at entrances to Senior Living Communities and gives operators the ability to sign-in, record body temperature, and ask CDC-recommended COVID-19 screening questions for every staff member, visitor and third-party caregiver who enters the community.

Touchless Integrated Thermometer

The Accushield Integrated Touchless Thermometer instantly detects the body temperature of the person signing in and automatically passes the measurement to the kiosk during the sign-in process.

ADDITIONAL FEATURES

- ✓ Able to capture temperature within 29 in
- ✓ Audible alarm can be utilized
- ✓ Temperature accuracy +/- 0.5° C
- ✓ *Medical grade class 2a Device - Pending
- ✓ Temperature recorded in 0.2 seconds
- ✓ Temperature Range - 34°C - 43°C

**Validation & Certificate Pending*

Features & Benefits

Instantly print name badges

Print custom name badges for every visitor who enters your community. The badge printing option provides increased awareness of who is in your community, and in turn, creates a safer environment to live and work.

Visitor reporting and analytics

The Accushield visitor sign-in system allows communities to track, analyze, and create reports based on the care delivered to residents by outside agencies and self-employed private care providers.

Optional

Credential outside care providers and vendors

The Accushield system gives communities a simple way to verify that third-party healthcare providers and other vendors have met industry-specific credentialing requirements (i.e. clear criminal background, insurance, TB screening, etc.)

Features & Benefits

Visitor photos

The Accushield visitor sign-in system uses the built in tablet camera to capture visitor photos. Management can quickly access these photos via the Community Dashboard.

Text or email notifications

The Accushield sign-in system can send a text message or email when visitors sign in to meet with a community staff member. COMMUNITY WATCH LIST: A text or email can be sent if a person that is banned from the community signs-in.

Community tour tracker

Capture, Track, and Record every community tour following a prospective resident's sign-in on the Accushield tablet. Designated community staff (ex. Sales and Marketing) can be notified via text or email automatically when a walk-in tour visits the community.

Features & Benefits

Evacuation management

IN AN EMERGENCY, TIME IS EVERYTHING AND SO IS THE ABILITY TO KNOW WHO'S IN YOUR COMMUNITY. Community managers can quickly access an online ledger of the visitors in the community and the residents that are away.

Love Meter

The Accushield visitor sign-in system tracks the least visited residents in your community. This simple data point allows your community to better manage and love the residents that may feel abandoned and isolated due to a lack of outside visitation.

Community watchlist

The Accushield visitor sign in system can instantly notify senior living community management and the front desk concierge if a visitor that is not allowed on campus signs-in.
